EDUCATION

University of California, San Diego

Bachelor of Science in Business Economics

GPA: 3.6/4.00

Expected June 2026

PROFESSIONAL EXPERIENCE

J.P. Morgan Securities

Corporate & Research - Analytics Associate

June 2025 – August 2025

- Analyzed 20+ public companies across fluorochemicals, electronic chemicals, OLED materials, and cybersecurity, summarizing business models, revenue drivers, capacity layout, product segments, and competitive positioning to support sector research and investment screening.
- Consolidated fragmented public information from annual reports, company disclosures, industry reports, and web sources into team Excel databases, improving data consistency, source traceability, and research efficiency for downstream sector analysis.
- Conducted in-depth benchmarking of 5–10 companies per assignment across operating scale, production capacity, plant footprint, profitability drivers, and pricing power, surfacing sector leaders and structural differentiators that informed the team's relative-value views and investment screens.
- Researched and structured 10+ 2024 IPO rejection cases from CSRC and Stock Exchange filings into a cross-sector database of strategic, operational, financial, and compliance red flags, used by the team to screen analogous downside risks in active investment candidates.
- Supported thematic reports on fluorochemicals and OLED materials and prepared company-level research on Venustech, covering market size, applications, technology categories, ownership structure, business segments, and industry risks.

One Pioneer

Client Service & Research Assistant

June 2024 – March 2025

- Prepared PPT decks, product explanation notes, and client discussion materials, translating complex insurance product structures into clear, client-ready insights for meetings and relationship management.
- Reviewed insurance illustrations, product brochures, pricing details, coverage terms, and policy rules across multiple providers, extracting key information to build standardized product comparison materials.
- Compared product structures, fee components, benefit features, coverage options, and client suitability considerations, helping the team evaluate product competitiveness and solution fit across alternative insurance plans.

PROJECT EXPERIENCE

RBC Virtual Investment Banking Project

- Conducted sector and macroeconomic analysis to evaluate growth drivers, competitive dynamics, market trends, and capital markets opportunities, linking market data and company fundamentals to financing and transaction strategy.
- Developed client-ready pitch materials summarizing industry insights, company analysis, investment rationale, and transaction considerations for executive-level discussion.

JPMorgan Chase Investment Banking Job Simulation Program

- Screened six potential acquisition targets for a North American beverage company seeking expansion into Asian markets, summarizing business profiles, market positioning, and product portfolios to evaluate strategic fit and support preliminary cross-border M&A discussions.
- Researched regional market conditions, consumer segments, and operational models of target breweries, comparing their product offerings and distribution strategies with the acquirer's existing business to assess compatibility.
- Developed a DCF valuation model for the preferred acquisition target, projecting financial performance and free cash flows to estimate enterprise value and support a mock client recommendation regarding potential opportunities.

PGIM Fixed Income Virtual Experience Program

- Built a 3-year Excel credit-spreading model for Scotts Miracle-Gro, standardizing 2019–2021 financial statements into an issuer-level credit review template.
- Evaluated simulated portfolio metrics including return, active return, volatility, and Sharpe ratio, connecting issuer-level credit risk to portfolio suitability and risk-adjusted performance.
- Analyzed Adjusted EBITDA add-backs, margin pressure, and free cash flow before vs. after dividends, identifying how shareholder distributions reduced cash-flow cushion and debt repayment flexibility.
- Calculated 6+ credit metrics, including Debt / EBITDA, interest coverage, Current Ratio, and FCF / Debt, assessing repayment capacity, liquidity profile, leverage risk, and bondholder protection.

SKILLS

- Investment Research:** Equity research, industry analysis, company due diligence, IPO risk screening, thematic research
- Financial Valuation:** DCF, NPV, WACC, CAPM, comparable company analysis, scenario analysis, sensitivity analysis
- Portfolio & Risk Analytics:** Peer benchmarking, sector comparison, downside-risk assessment, cash-flow analysis
- Data Analysis & Tools:** Excel financial modeling, PivotTables, PowerPoint, SQL, Python, Tableau, Power BI
- Financial Databases:** Bloomberg, company filings, annual reports, prospectuses, industry reports, public disclosures
